### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Molitor et al. US 4,650,193 taken alone or in view of either one of Hamada et al. US 4,929,678 or Kakiuchi et al. US 4,683,257.
- 4. The rejection set forth in the action mailed 10/3/05 under 35 USC 103 is deemed proper and is herein repeated.

## Response to Arguments

- 5. Applicant's newly amended claims and the arguments filed 3/3/06 have been fully considered but they are not persuasive.
- 6. The claims now recite a relative hardness property. Applicants argue that this hardness property is neither disclosed nor suggested by Molitor. This is not persuasive. While it is true that the art is silent as to the relative hardness of the center of the core

Application/Control Number: 10/716,627

Art Unit: 1713

and the surface of the core, this is not seen to render the claims patentably distinct.

The claimed property is a result of the core composition being subjected to the vulcanizing and press molding. The art is seen to render obvious the composition as well as the vulcanizing and press molding, see column 5 lines 7+. Given that the composition and molding steps are rendered, it is reasonable to presume that the relative hardness property recited in the claims is either anticipated or rendered obvious by the art. There is nothing in the art which is seen to teach away from the claimed property.

Page 3

- 7. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Binette et al. US 6,315,684 or Watanabe et al. 6,966,850.
- 8. Watanabe et al. shows golf balls where the core has a surface portion having a JIS C hardness of 20 less than the center portion of the core, see column 6 lines 21+. The butadiene polymers referenced at column 5 lines 28+ are seen to anticipate those claimed. The peroxide and processing aids are seen to be obvious functional materials referenced in the examples.
- 9. Binette et al. shows golf balls having core portion formed from polymeric compositions which are seen to anticipate or render obvious those claimed, see columns 11 and 12. This patent further describes molding and curing steps which are seen to render core portions having the relative hardness values claimed, see column 15 lines 8+.

#### Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
